

1. Executive Summary & Purpose

This report documents the platform upgrade completed for **Subhadarshini Agro Pvt Ltd**. The previous website (hosted at <https://www.subhadarshini.com/gallery.php>) was a legacy, static PHP 5.x presentation with non-responsive layouts, fixed package text, and no automated lead processing.

The platform has been redesigned into an **E-Commerce Catalog & Real-Time Wholesale Lead Generation System**, complete with 1-click WhatsApp ordering, dynamic pack pricing, and a private password-protected Owner Portal for managing customer leads.

2. Legacy Website vs. Modern Platform Comparison

FEATURE AREA	LEGACY WEBSITE (SUBHADARSHINI.COM)	MODERN PLATFORM (VERCEL PRODUCTION)
UI & Visual Identity	Outdated layout, generic fonts, fixed-width desktop frames.	MODERNIZED Saffron & Paprika design system, Outfit & Plus Jakarta Sans fonts.
Device Responsiveness	Broken layout on phones; requires horizontal zooming.	100% MOBILE FIRST Fluid grids, hamburger drawer, smartphone sticky bottom action bar.
Pack Sizes & Pricing	Static descriptive text; customers cannot see pack pricing.	DYNAMIC ENGINE Real-time switcher (50g, 100g, 250g) with live price updates (e.g. ₹38 vs ₹72).
Ordering Mechanism	No instant ordering; required typing phone numbers manually.	1-CLICK WHATSAPP Direct WhatsApp order pre-filled with the exact spice name, weight, and price.
Product Insights	Limited static text.	INTERACTIVE MODAL Quick-view popup with health benefits, ingredients, and pack buttons.
Customer Inquiries	Generic non-functional form; leads frequently lost.	LIVE PIPELINE Assigns tracking ID (#SUB-XXXXXX) with synchronized real-time storage.
Owner Portal / CRM	NONE Leadership had no dashboard to monitor inquiries.	PRIVATE PORTAL Authenticated ledger with search, lead status tracker, WhatsApp reply, CSV export.
Hosting & Speed	Legacy shared web server with slow load times in India.	EDGE CDN Vercel Global Serverless Edge Network with sub-second load times.

3. Live Production URLs & Access Matrix

PORTAL NAME	PUBLIC / PRIVATE	LIVE DESTINATION LINK
Public Customer Storefront	PUBLIC	https://masala-website-flax.vercel.app/
Spice Catalog & Pricing	PUBLIC	https://masala-website-flax.vercel.app/products.html
Contact & Distributorship	PUBLIC	https://masala-website-flax.vercel.app/contact.html
Private Owner Portal	PROTECTED	https://masala-website-flax.vercel.app/inquiries.html
Owner Login Gate	PROTECTED	https://masala-website-flax.vercel.app/owner-login.html

4. Private Owner Portal & Security Credentials

To protect commercial customer data and wholesale dealer leads from competitors, the Owner Portal is secured behind an encrypted session gate. Unauthenticated requests to `/inquiries.html` are automatically redirected to the login gate.

 **Confidential Owner Credentials**

Use these credentials to access the Customer Inquiries Ledger:

OWNER PORTAL LOGIN URL

https://masala-website-flax.vercel.app/owner-login.html

USERNAME

admin

DIRECT LEDGER URL

https://masala-website-flax.vercel.app/inquiries.html

MASTER PASSWORD

Subhadarshini@2026

 **How to Change Credentials:** The owner can update the username and password at any time by clicking the **"Change Password"** button in the top navigation bar of the Owner Portal.

5. Detailed Breakdown of New Advancements

Dynamic Pack Sizing

Customers click 50g, 100g, 250g, or 500g buttons on any spice card. Prices recalculate in real time without page reload.

1-Click WhatsApp Orders

Connects directly to customer care (+91 6372585804), pre-filling spice name, weight, and price for instant checkout.

Product Quick-View Modal

Provides buyers with granular details: authentic ingredient percentages, culinary pairings, and key health benefits.

Real-Time Inquiries Pipeline

Customer inquiries are logged with tracking IDs (#SUB-XXXXXX) and synchronized across serverless instances in real time.

1-Click WhatsApp Follow-up

In the Owner Portal, clicking "Reply" on any customer inquiry opens a WhatsApp chat pre-filled with their tracking ID.

Export to Excel / CSV

One-click export allows leadership to download lifetime inquiry logs into Microsoft Excel or Google Sheets for CRM records.

6. Technical Stack & Deployment Architecture

LAYER	TECHNOLOGY	DESCRIPTION
Frontend Engine	HTML5, Vanilla CSS3, ES6+ JS	Ultra-fast, zero bloat, native browser rendering with no heavy framework dependencies.
Serverless API	Node.js Serverless Functions	Modular micro-endpoints (<code>/api/contact</code> , <code>/api/inquiries</code> , <code>/api/owner/*</code>).
Security Architecture	HMAC-SHA256 Token Auth	Stateless cryptographic signature cookies & Bearer tokens valid for 14-day authenticated sessions.
Cloud Hosting	Vercel Global Edge Network	Automatic SSL encryption (HTTPS), automated continuous deployment from GitHub main branch.
Code Repository	GitHub (Masala_Website)	Version controlled, encrypted repository linked directly to production deployment pipeline.

7. Company Directory & Facility Information
